

 CAPABILITIES

A Leader in Mission Critical Environments

ConCor Networks is a leader in mission critical, low voltage, communications, and technology systems. Today's systems require increasing innovation and more strategic ways of gathering and analyzing information. **ConCor works with clients to help deliver innovative technology systems that are faster, better, and more efficient.**

A Full Suite of Innovative Technology Solutions—for System-Rich Buildings

When downtime isn't an option, ConCor helps provide solutions that include cabling, power distribution systems, uninterruptible power supply (UPS) systems, cable tray installation, rack and cabinet installation, and communication networks—for both high-tech and traditional applications.

Design-Build Services

ConCor experts often get involved early in the design-build process to help clients capture vital information and incorporate it into the final design. By using computer modeling to identify potential problems and test alternatives before conflicts appear, ConCor is well equipped to design and build projects of nearly any scope and complexity.

WHAT CAN WE DO FOR YOU?

Data Center Services

Using sophisticated telecommunication systems, automation technology, and advanced electrical power distribution systems, ConCor's data center services help promote continuous operation in these critical environments.

Our services include:

- › Design, installation, and maintenance
- › Data center cabling
- › Voice and data infrastructure
- › Security
- › Network equipment
- › Cabinets
- › Racks
- › Overhead and under floor cable tray system installation

MAJOR MARKETS SERVED

Biotech/Healthcare

- Hospitals
- Pharmaceutical
- Assisted living
- Memory care facilities
- Urgent care
- Outpatient surgical centers

Commercial

- Office buildings
- Real estate
- Property management

Education

Manufacturing/Industrial

- Distribution/Warehousing
- Food processing
- Water/Wastewater treatment

Public

- Government municipalities
- Campus complexes
- Town & city halls

Non-Profit

- Religious institutions & faith-based associations
- Humanitarian organization

Technology

- Clean rooms

Data Centers

Transportation

Voice/Data Services

For today's businesses, the distribution of information is a necessity, whether its transmitted by voice, computer, video, or other electronic media.

From network design, cabling, and integration services delivered by Registered Communications Distribution Designer (RCDD)-qualified engineers to installation by Building Industry Consulting Service International (BICSI)-certified installers, ConCor has the service expertise and extensive experience to successfully implement structured cabling, voice and data telecommunication system design, and installation services for virtually any size business.

HIGH-PERFORMANCE EXPERTS. DELIVERING LOW VOLTAGE AND TECHNOLOGY SOLUTIONS.

Data center specialty systems

Design-build

Technology solutions

Distributed antenna systems

Specialty systems

- Nurse call
- Security/AV/sound
- Paging/intercom

Maintenance/mobile service

- Outside plant

Maintenance Services

The ConCor team provides specialized maintenance services that include facility, preventive, and electrical maintenance services. These solutions help to keep shut downs and downtime to a minimum. Whether working on a college campus, in an auditorium, or throughout a state-of-the-art healthcare facility, we work with our clients to help their low voltage, telecom, structured cabling, CCTV, CATV, security, audio-visual systems, and more operate efficiently.

Wireless Infrastructure Services

ConCor's BICSI-certified professionals provide wireless infrastructure services to help support our clients' voice and data telecommunications systems. This includes wireless network installation services, cell tower maintenance, and distributed antenna systems, as well as a varying spectrum of low voltage construction and telecommunications solutions.

We are ready to manage the entire wireless infrastructure lifecycle from site planning and installation to maintenance and upgrades. ConCor technicians have experience in virtually every aspect of the wireless infrastructure—audit and inspection services, complete tower and site construction, technical program management, and site maintenance.
